THE EPIDEMIOLOGY MONITOR

A monthly update covering people, events, research and key developments

## Transition to a Free All Digital Publication

As the saying goes, “the times, they are a changin.”

Beginning with the January 2013 issue, The Epidemiology Monitor begins its formal transition to becoming a free access, all digital publication. Access to the online digital edition will be free of charge to all readers who subscribe by visiting [www.epimonitor.net/Subscribe.htm](http://www.epimonitor.net/Subscribe.htm) and providing their email address. This change is in response to the opportunities afforded by new technologies and the changing reading habits of persons in the digital age.

The newsletter will appear online in the same familiar format subscribers are accustomed to, and they will be able to read through the publication on their computers or tablets in the same manner as they did with the print version. Over the next year, we will work to make the newsletter available on a wider range of mobile devices.

Readers with paid subscriptions that extend into 2013 will continue to receive a print version of the newsletter until their subscription expires. We will not renew or accept any new subscriptions for print copies effective January 15, 2013. All digital subscribers will be able to print the newsletter if they wish and save and retrieve copies easily.

The benefits of the online version, in addition to cost savings, include easier access to more timely information, receiving an alert about each issue, and having the ability to link to information from news articles and advertisements. For advertisers, the digital edition will provide the option to present full color ads, and the newsletter’s open access will give advertisers significantly wider circulation to more readers. For all of us, the digital edition is more environment-friendly.

One thing that will not change is our commitment to meet the news and information needs of the epidemiology community. We hope that you will join us in this move into a digital future and share this notice about free access with your friends and colleagues in epidemiology and public health. Subscribe now at [www.epimonitor.net/Subscribe.htm](http://www.epimonitor.net/Subscribe.htm). We invite you to send us your comments and suggestions on how we can continue to serve most effectively as “the voice of epidemiology” in the digital age.

 BLOOMBERG  
 SCHOOL OF PUBLIC HEALTH

\*Course offerings and faculty are subject to change. Proficiency in English language is required.

Albert Einstein College of Medicine  
OF YESHIVA UNIVERSITY

**Assistant/Associate/Full Professors of Cardiovascular Disease Epidemiology  
Department of Epidemiology and Population Health  
Albert Einstein College of Medicine**

Applications are invited for full-time Assistant/Associate/Full Professors in cardiovascular disease epidemiology in the Department of Epidemiology and Population Health (DEPH) at the Albert Einstein College of Medicine, a leading research institution with a strong commitment to excellence in research. The DEPH is well recognized for its multi-disciplinary programs in epidemiologic and prevention research and is currently undergoing considerable expansion of its faculty base. The department is actively involved in a number of ongoing NIH-funded cohort studies that offer research opportunities, including the Hispanic Community Health Study/Study of Latinos (SOL), Women's Interagency HIV Study (WIHS), Women's Health Initiative (WHI), Cardiovascular Health Study (CHS), and the Einstein Aging Study.

The epidemiologists who fill these positions will be expected to develop independent programs of research in the epidemiology of cardiovascular disease and related research areas (e.g., diabetes, obesity), and to teach medical and graduate students. The positions, each of which comes with a generous start-up package including 3 years of full salary support plus research funds, will provide opportunities for diverse research experiences in a highly collegial environment with potential for growth.

The successful candidates will have either a PhD in epidemiology or equivalent, or an MD with advanced training in epidemiology, strong verbal and written communication skills, relevant research and teaching experience, and a record of peer-reviewed publications. Rank will be commensurate with experience.

Interested candidates should submit a cover letter describing their research and teaching experience, their full curriculum vitae, and a list of three referees, to:

Tom Rohan, M.D., Ph.D. (Ref: Einstein-CVE), Chairman,  
Department of Epidemiology and Population Health  
Albert Einstein College of Medicine, Jack & Pearl Resnick Campus,  
1300 Morris Park Avenue, Bronx, New York 10461

Phone: (718) 430 3355, Fax: (718) 430 8653, Web: <http://eph.aecom.yu.edu>

Applications will be accepted on a continuing basis until the positions are filled. Albert Einstein College of Medicine is an equal opportunity employer.

NATIONAL ACADEMY OF SCIENCES

**Biostatisticians  
Radiation Research – Hiroshima

## SCHOOL OF PUBLIC HEALTH

### Department of Epidemiology and Biostatistics

The Department of Epidemiology and Biostatistics is seeking an **Assistant Professor** (tenure-track) position in Epidemiology in our School of Public Health. The Department's mission is to improve health and reduce health disparities in local communities, the state of Maryland, and the nation. We accomplish this by using established epidemiological and quantitative methods, as well as developing new scientifically grounded approaches, that are applied predominately to identifying determinants of health and discovering and evaluating primary and secondary prevention strategies for chronic diseases. We offer the MPH degree in the concentrations of Epidemiology and Biostatistics and a PhD in Epidemiology. The position represents a unique opportunity to join a growing department and make important contributions to an exciting research agenda and graduate student training program. Research areas of particular interest to the department include, but are not limited to, social and behavioral factors in health and epidemiology of chronic diseases (e.g. asthma, cardiovascular disease, cancer and diabetes), infectious diseases, and obesity. Special emphasis on health disparities, disease prevention, nutrition, and health promotion is desirable. This is a 12-month tenure-track appointment with up to 75% state funding. Salary is competitive and commensurate with qualifications and experience. Appointments may begin as early as August 2013. The University of Maryland is an equal opportunity and affirmative action employer. Review of applications will begin December 15, 2012 and continue until the position is filled. For more application information go to: <http://jobs.umd.edu> specifying faculty position 118647.

University of Nevada, Reno

### Assistant Professor

The University of Nevada, Reno, School of Community Health Sciences is seeking candidates for a full-time faculty position in Epidemiology. Research and teaching interests in Chronic Disease epidemiology are preferred but all candidates will be considered. Duties include: teaching graduate and undergraduate students, advising graduate, developing an independent program of scholarship, engaging in community and professional service appropriate for a university faculty member. For a complete position description and requirements, please go to:

<http://tinyurl.com/anb7q6x>

Application reviews will begin January 31, 2013.

## Faculty Position in Health Services Research Department of Health Sciences Research

### *Heal the sick, advance the science, share the knowledge.*

Mayo Clinic in Rochester, Minnesota seeks a Health Services Researcher with a Ph.D. in a field relevant to health services research (i.e., public health, social science, health research methodology, health services research) or an M.D. with additional training or experience in one or more of these areas for a faculty position as an Assistant, Associate or Full Professor.

The Health Services Researcher is expected to possess a broad understanding of one or more of the following areas: evaluation of health promotion programs, including worksite programs; comparative effectiveness research; operations research; health economics; health disparities; survey and patient-reported outcomes research; quality and implementation research; knowledge synthesis; knowledge translation (including shared decision making). The candidate will also have strong methodological skills in experimental and observational designs, intervention research, survey methodology and statistical analysis, although support in these areas is also available. The ability to develop, implement and promote practice evaluation and research activities involving multiple stakeholders in a rapidly growing and changing environment is required as is an in-depth understanding of pharmacy and medical claims/billing data. Specific experience and national recognition as an expert in the delivery of healthcare research and national recognition as an expert preferred. The candidate must possess experience directing research projects, collaborating with others in a multidisciplinary setting and securing extramural funding and must have a strong publication record.

Formed in 2011, The Center for the Science of Health Care Delivery at Mayo Clinic aspires to create, evaluate and implement high-value patient-centric care delivery models with the goal to improve the value of healthcare. Visit <http://mayoresearch.mayo.edu/mayo/research/science-of-health-care-delivery/index.cfm> for more information.

Mayo Clinic is a premier academic medical center with over 3,800 physicians and scientists in a unified multi-campus system. This unique environment brings together the best in patient care, groundbreaking research and innovative medical education. While Mayo Clinic does not offer tenured positions, our policies and practices demonstrate a commitment to ongoing positions. Mayo Clinic offers a highly competitive compensation package with sustained intramural funding, outstanding laboratory facilities, capital equipment funding, technical and computational resources and exceptional benefits.

To apply and learn more, please visit [www.mayoclinic.org/scientist-jobs/](http://www.mayoclinic.org/scientist-jobs/) and reference **job posting number 18866BR**. Applications should include a cover letter, CV and a statement of research interests. Specific questions related to the posting should be directed to:

# University of South Australia

**Associate Professor  
Senior Lecturer  
Lecturer**

Commenced in August 2012 the School of Population Health will consolidate and advance the University of South Australia's capacity for training research professionals in the analysis of complex population-level data to inform health and social policy. The School will conduct teaching in areas including population health, social epidemiology, public health, health promotion and health economics and will implement an accredited Masters of Public Health degree. The School will also evolve a novel doctoral training program combining rigorous training in population health methodology with original research on contemporary health challenges which face mainstream as well as vulnerable populations including Aboriginal Australian and other disadvantaged peoples, in national and international settings.

The candidates appointed to this position will be established, leading or promising academics with discipline-based training and authority in epidemiology or biostatistics, otherwise applied social statistics, demography, or social measurement and psychometrics, focusing on population or public health problems. Each appointee will provide leadership in their discipline of expertise, and enhance the research productivity of the School in collaborative, multi- and trans-disciplinary Category 1 research initiatives, authorship of refereed publications, and supervision of postgraduate research degree students. The positions will also provide teaching of methodology to postgraduate students and contribute to the teaching of the principles of population health throughout the Division of Health Sciences.

The successful candidates will hold a relevant research doctorate combined with successful completion of postgraduate coursework in research methods and a strong record of national/international achievement substantiated by excellence in research, teaching and supervision. Experience with longitudinal analysis and/or multi-level or analysis of clustered observations is essential as are demonstrated high level interpersonal skills and the ability to function well in a multidisciplinary environment. An attractive employment package with superannuation benefits and relocation support will be negotiable for successful applicants.

**Applications close: 5.00pm Monday 31 January 2012** <http://www.unisa.edu.au/workingatunisa>

Enter Job #20120753

The City University of New York (CUNY) has successfully established an accredited School of Public Health (SPH), headquartered in East Harlem. This SPH has identified the following priority areas on which to focus its teaching research and service efforts: urban health, chronic disease prevention and management, population aging and health equity. The CUNY SPH is a consortium of the public health programs at Hunter (East Harlem campus), Brooklyn, and Lehman Colleges, and the CUNY Graduate Center. The CUNY SPH offers a range of CEPH-accredited MPH and DPH degree programs, including an MPH in either epidemiology or biostatistics and a DPH in epidemiology.

This 9-month, salaried tenure-track appointment at the rank of either **Assistant or Associate Professor** will be made at Hunter College, beginning September 2013. Visit the website for more details: <http://www.cuny.edu/site/sph.html> Key responsibilities include:

- ▶ Strengthening and further developing the biostatistics training component of the EPI-BIOS MPH program.
- ▶ Providing support to the school-wide MPH and DPH program.
- ▶ Seeking funding with interdisciplinary research teams.
- ▶ Teaching graduate courses in biostatistics and helping to develop new courses aligned with the EPI-BIOS program, as needed.

#### **MINIMUM QUALIFICATIONS**

Doctorate in biostatistics, or similar field in the social or natural sciences (e.g., statistics, epidemiology, public health, medicine). Also required are a demonstrated track record of proficiency in teaching both introductory and advanced biostatistics (or near equivalent course material) at the graduate level, interest in and potential for productive scholarship or creative achievement, and desire to collaborate with others for the good of the EPI-BIOS Program and the CUNY SPH.

#### **COMPENSATION**

Commensurate with qualifications and experience within the salary range for the title:

- ▶ 9-month salary for Assistant Professor: \$42,873 - \$74,133
- ▶ 9-month salary for Associate Professor: \$55,602 - \$88,418

Candidates with a strong and sustained track record of peer reviewed publications, grant history, leadership skills and national recognition will be considered for the rank of Full Professor.

Salary offers will be commensurate with academic rank, experience, academic accomplishments and national reputation.

Instructions on how to apply for a position at CUNY:

<http://cuny.edu/employment/cunyfirst/CUNYfirst-application.html>

Open until filled with first review of application material to begin Dec 1, 2012.
