

The Year In Epidemiology - 2021

The 2021 Epidemiology Monitor calendar lists 98 events with definite dates and 67 possible events for which information is still unavailable as of publication in late December. Due to the Covid pandemic, approximately half of scheduled will now take place virtually. Others which are scheduled for later in the year will make the decision regarding presentation format closer to the scheduled date.

The decision to hold events virtually can impact the duration of the events since it is unrealistic to expect attendees to participate in a full day of screen time. This means that some events have been stretched out with limited sessions each day or by providing sessions only during a limited block of time during the day such as mornings. Setting the time for events is challenging sponsors because attendees can be scattered over several time zones.

Also, conference organizers are faced with the challenge of delivering their sessions in separate tracks simultaneously as happens at in-person events. In some instances this means sessions are being offered in series and this lengthens the duration of some conference events. Finally, the cost of participating in some events has been lowered because of the virtual format.

The expectation is that most frequently these events will be convened on a Zoom platform. Anticipating a higher than usual demand for short courses given online, at least one course sponsor has limited the number of courses that any one individual can take in 2021.

Rather than skipping a meeting, events that occur normally only every two or three years such as the meeting of the International Epidemiological Association and others which had been scheduled for 2020 have been rescheduled for 2021.

A new event in 2021 will be the first World Field Epidemiology Day on September 7, 2021. According to the organizers, the event is intended to start a global movement to recognize and raise awareness of the vital role of field

epidemiologists in protecting the health of populations...and to advocate for increased investment in field epidemiology training, research, and professionals.

Given that only limited information is currently available for a large percentage of events, readers with more updated information about any of the events listed here are encouraged to contact The Epidemiology Monitor. We will update our calendar each month so please check each issue or visit our website regularly for any event updates as they get posted.

Announcement

2020 National Survey of Faculty Salaries in Academic Epidemiology

The survey of salary data for academic epidemiologists during the academic year 2019-2020 is now available to be completed. The survey is being sent via email to over 100 departments of epidemiology and preventive medicine to identify and promote competitive compensation for faculty members.

To learn if your organization and/or contact person has received this survey link please [CLICK HERE](#). If your department is not included, please contact The Epidemiology Monitor at editor@epimonitor.net if you are interested in participating in the survey on behalf of your institution.

The continued partnership between the University of Pennsylvania and The Epidemiology Monitor has not only helped to better publicize the survey and its results, but has also increased the response rate. As was done last year, the University of Pennsylvania will perform the analysis of de-identified data and will be blinded to all identifying institutional information.

One institutional representative from each participating institution should provide all anonymized faculty salary data within their division or department of epidemiology. To perform the analysis, the University of Pennsylvania will have access to the information only after it has been stripped of any institutional identifiers. Surveys must be completed by Friday, February 5, 2021. ■

January 2021

January 4-22

Winter Program: Winter Institute

Sponsor: Johns Hopkins School of Public Health

Location: Virtual

Contact: Web: <https://bit.ly/2JlaIaT>

January 6-17

Winter Program : EpidM Winter Program 2020

Sponsor: VU Medical Center - Dept of Epidemiology

Location: Virtual

Contact: Web: <https://bit.ly/2JKo72k>

January 18-29

Short Course: Pharmaco-Epidemiology And Drug Safety

Sponsor: Erasmus, MC

Location: Rotterdam, The Netherlands

Contact: Web: <https://bit.ly/2RPzujl>

January 18 - February 19

Summer Program : Summer Program 2021

Sponsor: Australian Consortium for Social & Political Research

Location: Canberra & Melbourne, Australia

Contact: Web: <https://bit.ly/3lW7iTk>

January 20-25

Winter Program : Swiss Epidemiology Winter School

Sponsor: Institute of Social & Preventive Medicine - Bern

Location: Virtual

Contact: Web: <https://bit.ly/2LgSt1a>

January 29

Meeting : Topics in Infection 2021

Sponsor: Royal Society of Tropical Medicine & Hygiene

Location: Virtual

Contact: Web: <http://bit.ly/2JYEM6U>

NOTE: The events listed below have traditionally run in **January** each year. As of the date of publication, we cannot locate updated information for these specific events for 2021. We will be updating our calendar monthly throughout 2021. If you have any information on these events please contact us at events@epimonitor.net Please check our website and newsletter issue often for new information.

CENTER FOR
HEALTH AND HAPPINESS

HARVARD T.H. CHAN
SCHOOL OF PUBLIC HEALTH

2021 SUMMER SHORT COURSE

Exploring the Linkages Between **Mental Well-Being & Physical Health Outcomes**

The five-day course, targeting junior scholars (junior faculty and postdoctoral fellows) and doctoral-level graduate students, will provide attendees with a systematic and rigorous overview of the relationship between positive mental well-being and physical health, drawing on a variety of empirical methods with careful consideration of measurement issues. Applications are due **April 15**.

HOST

University
College
London
Format TBA

DATES

July 12-16,
2021

TUITION

\$2,500/£1,900*
**Pricing may vary depending
on course format*

The course may be offered in-person, virtually, or a combination of the two. A final decision on course format will be made in early 2021, but early applications are encouraged as space is limited.

**Division of Preventive Medicine
Brigham & Woman's Hospital
Harvard Medical School**

**MULTI-OMICS AND SYSTEMS EPIDEMIOLOGIST
ASSISTANT / ASSOCIATE PROFESSOR**

The Division of Preventive Medicine, Department of Medicine, at Brigham and Women's Hospital and Harvard Medical School seeks an Assistant or Associate Professor level scientist in multi-omics and systems epidemiology. Applicants should possess a PhD and/or MD degree and have several years of relevant experience. Opportunities exist for collaboration with an active research group and access to large cohorts and blood/DNA repositories. Preference will be given to individuals who have demonstrated the ability to obtain grant support for their research. Applicants should have well documented commitment to epidemiologic research, and expertise in integration of multi-omics biomarker research (genomics, epigenetics, transcriptomics, metabolomics, and/or proteomics) in relation to chronic disease epidemiology or aging research. Appointment at the level of Assistant or Associate Professor and compensation will be commensurate with experience and institutional policies, including teaching activities with Harvard-affiliated students/trainees.

Please send CV, a description of research goals and accomplishments, a summary of current and past grant support, names of at least three references, and representative reprints of 3-5 original reports by February 15, 2021 to:

JoAnn E. Manson, MD, DrPH
Chair, Multi-Omics and Systems Epidemiology Search Committee
Division of Preventive Medicine
Brigham and Women's Hospital/Harvard Medical School
900 Commonwealth Avenue
Boston, MA 02215-1204
Email: jmanson@rics.bwh.harvard.edu
Phone: 617-278-0855

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, pregnancy or pregnancy-related condition, or any other characteristic protected by law.

Tulane University

Research Assistant Professor - Epidemiology

School of Public Health & Tropical Medicine / Department of Epidemiology

Tulane University School of Public Health and Tropical Medicine is seeking applications for a non-tenure track, full-time position at the rank of Research Assistant Professor in the Department of Epidemiology. Candidates with a doctoral degree in epidemiology, community health, clinical research or implementation research or an MD with a master's degree in epidemiology or clinical research will be considered. The faculty member will actively participate in research grant applications, management of on-going and new research studies, and preparation of manuscripts and presentations. The candidate should have excellent communication and inter-person skills to work with community partners.

Review of applications will begin as soon as possible and applications will be accepted and reviewed until the position is filled. Applicants should send a cover letter with names of at least three references and complete resume to:

Jiang He, MD, PhD
Tulane University School of Public Health and Tropical Medicine
1440 Canal Street, Suite 2000
Mail Box 8318
New Orleans, LA 70112

Email: jhe@tulane.edu

***Tulane University is an Equal Opportunity / Affirmative Action employer.
Women and Minorities are encouraged to apply.***

Knowledge that will change your world

The University of Alabama at Birmingham

Assistant / Associate / Full Professor - Department of Epidemiology

The University of Alabama at Birmingham (UAB), Department of Epidemiology in the School of Public Health is inviting applications from outstanding candidates for two full-time tenure-track faculty positions at the rank of Assistant Professor, Associate Professor, or Professor (12-month appointments with rank and tenure status commensurate with qualifications). Eligible candidates must have a PhD, MD, or equivalent doctoral degree with graduate-level training in epidemiology or a closely related field. Preferred qualifications include a record of peer-reviewed publications, experience in teaching graduate or undergraduate level epidemiology courses and demonstrated ability to work effectively in an interdisciplinary, collaborative academic setting. For the rank of Associate Professor or Professor, applicants should have evidence of securing extramural funding to support an independent research program. We are seeking applicants who have or can develop research programs in the substantive areas of infectious diseases (particularly HIV/AIDS), cancer, social determinants of health or climate change and population health. Applicants with an interest in global health are also welcome. Applicants with research programs that will enhance and build on the departmental strengths in cardiovascular diseases, genomics, and health disparities will also be considered.

UAB pursues the frontiers of education, research, and health care and strives to be one of the most dynamic and productive universities of the 21st century. UAB ranked 15th in NIH research funding among public universities in fiscal year 2016 and has transformed the Birmingham metropolitan area into a nexus of research, medicine, business, and development. The successful applicant will have the opportunity to foster research collaborations across campus and leverage resources available through our University-Wide Interdisciplinary Research Centers (<http://www.uab.edu/research/administration/CentersCores/Pages/UWIRCbyTitle.aspx>) and core facilities (<http://www.uab.edu/research/administration/CentersCores/Pages/CoresbyTitle.aspx>)

Birmingham has thriving outdoors, arts and cultural scenes (<http://birminghamal.org/>) and is one of the best places to live, work and play. Our restaurant scene is truly world class, featuring national award winning restaurants and chefs.

To apply, please submit: 1) a curriculum vitae, and 2) a cover letter describing your interest in the position online at <http://uab.peopleadmin.com/postings/7936>. Applications will be reviewed immediately and will continue until the positions are filled.

UAB is an Equal Opportunity/Affirmative Action Employer committed to fostering a diverse, equitable and family-friendly environment in which all faculty and staff can excel and achieve work/life balance irrespective of race, national origin, age, genetic or family medical history, gender, faith, gender identity and expression as well as sexual orientation. UAB also encourages applications from individuals with disabilities and veterans.

A pre-employment background investigation is performed on candidates selected for employment.

Emergency Medicine, Injury Prevention Center Faculty MD-MPH or PhD, Senior Scientist

The Department of Emergency Medicine (EM) at the Boston University School of Medicine (BUSM) and Boston Medical Center (BMC) seeks an academic faculty member, for our Injury Prevention Center (IPC). Applicants can be at the Assistant, Associate or Professor level, with IPC leadership opportunity for applicants with significant experience.

BMC is a level-one trauma center with an annual census of over 130,000, serving as Boston's major safety net hospital. The Department of Emergency Medicine is an independent academic department within BUSM and BMC. The BMC ED is the medical control hub and academic base for Boston EMS.

We seek candidates with a demonstrated record of injury prevention research to join and assume leadership roles in the IPC. The BMC IPC, founded in 2000, is an ED-based research, education, and advocacy collaborative with focus on opioid harm reduction interventions, violence intervention advocacy, traffic fatalities, youth concussion/brain injury, and older adult falls epidemiology and intervention. IPC personnel include PhD researchers and EM clinicians who collaborate closely with the BUSM Departments of Surgery, Pediatrics, Neurology, and Geriatrics, the Boston University School of Public Health, the Massachusetts Department of Public Health, and other regional and national injury research centers.

Successful candidates will have a MD, PhD, or equivalent degree, and will demonstrate a commitment to the training of EM residents and students and mentoring of junior faculty. Candidates may have expertise in one or more of the current IPC focus areas or in other areas of injury prevention. Preference will be given to applicants with a proven track record in injury prevention research and grant funding. The position comes with competitive salary commensurate with experience, an excellent benefits package, and a faculty appointment.

BMC/BUSM is an equal opportunity/affirmative employer. The BMC Department of Emergency Medicine is exceptionally committed to diversity and inclusion within our faculty and residents and welcomes applicants from diverse backgrounds.
